How long did it take you to get diagnosed? I was finally diagnosed in 2002.

What's your worst CH experience? When I was visiting my family in Sweden and was hit very hard. I went to the ER and was told that I had headaches caused by smoking and drinking coffee. I was given sesame-seed oil to drip into my nostrils and that would take care of the problem...

What made you want to get involved with OUCH? The ignorance displayed by so many doctors when it comes to CH. I want to see a change in their attitudes and I firmly believe that OUCH can make that happen. I have idea's on how to go about this and I am working on a plan of action.

What is your personal goal while in service? To get back to the basics of spreading information about CH. I would like to see information at doctors offices as well as media coverage and an overall acceptance of CH. I would like to see OUCH start a cyber meeting space, specifically for the medical community, where CH is discussed with ideas and research being shared. I have a personal stake in the continuing research as to the cause and treatment of CH since I would very much like to be free of this affliction.

Place of birth: Irwin Army Hospital, Fort Riley, Kansas

How long have you had CH? 2 years - primary chronic

How long did it take you to get diagnosed? 1 month

What's your worst CH experience? During a hit I tried every abortive I had. Nothing worked. The attack lasted almost 3 hours. I ended up on my knees screaming and crying, banging my fist into my skull. It's a good thing I live out in the country otherwise I may have been taken to the local psycho ward. I suppose it was one where some people would have gone to the ER and my wife me to but I refused to go. I had read stories of sufferers misdiagnosed, treated incorrectly or treated like drug seeker's.

What made you want to get involved with OUCH? I found a website with people who not only knew what I was going through, but accepted me like a member of a family. There were links to medical research and thousands of people sharing their experiences. It was clusterheadaches.com. As I learned more I vowed I would "pay it forward" and help as many clusterheads as I could. In May 2005, I was asked if I would become a member of the Board of Directors. I look at working for OUCH as my chance to help cluster headache sufferers everywhere.

What is your personal goal while in service? To do my best every day to help OUCH fulfill it's mission and vision statements.

Any tips you can pass on? READ! The key to getting the proper treatment is information. Do your own research. Read everything about CH and take that research to your doctors. If your doctor is not approachable then maybe it's time to fire them and get a new doctor.

Eye color: Dark Brown

Place of birth: Brooklyn, NY, USA

How long have you had CH? I don't get it. Not the question - CH.

How long did it take you to get diagnosed? Not applicable to me... CH that is.

What's your worst CH experience? Since I'm not a sufferer, it would be the first time I witnessed a full-on cluster attack, while holding that person's hand.

What made you want to get involved with OUCH? I wanted to be supportive to someone I cared for who is a chronic CH sufferer.

What is your personal goal while in service? Of course generally, I'd to be of service in any way I can. Large goals are achieved in small steps. Personally, I'd like to contribute towards the effort to make doctors and ER rooms more aware of the CH condition and the tried and most effective methods of aborting an attack (when possible.) My current goal is to improve the chances that people get better immediate treatment for their suffering, when being attacked, until a cure is found. Any tips you can pass on? Tips... First - if you haven't been officially diagnosed, when you get an MRI ask for an MRA (at the same time), also, TRY O2 - even if it hasn't worked in the past. I've seen the effect change for the better for more than one person.

Nicknames: Sharky, Huck

Eye color: Blue/Green

Place of birth: Kennett Missouri

How long have you had CH? Fourteen years

How long did it take you to get diagnosed? Three years

What's your worst CH experience? Before I was diagnosed I had a 9 that lasted about 4 hours, while I was at my grandmothers on leave from the ARMY. My mother and grandmother had to take me to the ER. I ended up having to pay for the Cat scan as I didn't have authorization from the military to have it done in a civilian hospital and it came up negative.

What made you want to get involved with OUCH? Learning that other people had to deal with this thing as well. And the final motivator was marrying a sufferer.

What is your personal goal while in service? To do as much as I can to get our condition recognised and respected for what it is, not to be compared to migraine.

Any tips you can pass on? Coping - Hot coffee, try to remain calm - it's hard but it does help, always have your abortives stocked and easily accessible, develop a good relationship with your neuro's nursing staff, my nurse has proven to be an angel. Constantly try to find things that work well for you. Don't settle for "ok" treatment.
